## DAN Advanced Oxygen First Aid

### DAN Advanced Oxygen First Aid - 3 hours

This follow-on course to the DAN Oxygen First Aid course. The course is designed to allow the student to use the MTV-100 (Flow restricted, oxygen-powered ventilator) and Bag-valve mask with oxygen for resuscitation of a non-breathing diver.

Most of the knowledge development for the course is done at home in your spare time using the DAN student manual. During the course we will review that material and answer any questions that you have in a brief discussion session and then spend the rest of the time in actual hands-on scenarios in which you will provide first aid to your "injured" class members.

### Prerequisites

- Have a current first aid and CPR completion card. The course is open to divers and non-divers alike.

### **About Scubaventures:**

Scubaventures is a dive training business that offers PADI and DAN Instructor Training. I teach all of the Divers Alert Network (DAN) programs dealing with handling diving related medical issues. I am also an instructor trainer for the DAN programs. I teach the Emergency First Response First Aid and CPR Courses and am also an instructor trainer for that program as well. I am also an associate member of the Undersea and Hyperbaric Medical Society.

For more information on the course or to schedule a course, contact John Meyer, PADI Course Director at 206-300-0318 or e-mail me at [lets\\_dive \(at\) scubaventures-diving.com](mailto:lets_dive@scubaventures-diving.com).
