

Scubaventures Diving

DAN First Aid for Scuba Diving Injuries

DAN Oxygen First Aid in Diving Accidents - 4 hours

This course prepares the diver to administer oxygen First Aid to injured divers. The student will learn about respiration and circulation and the effect of diving related injuries on these systems. They will learn to identify the various diving related injuries and about the beneficial effects of oxygen on an injured diver and the specific types of oxygen equipment available.

Most of the knowledge development for the course is done at home in your spare time using the DAN student manual. During the course we will review that material and answer any questions that you have in a brief discussion session and then spend the rest of the time in actual hands-on scenarios in which you will provide first aid to your "injured" class members. In this skills development workshop you will review basic life support and provide oxygen to "injured divers" using the three mask options in the DAN Oxygen Kit.

Prerequisites

- It is recommended that you have a current first aid and CPR completion card. This is not required, however. The course is open to divers and non-divers alike.

About Scubaventures:

Scubaventures is a dive training business that offers PADI and DAN Instructor Training. I teach all of the Divers Alert Network (DAN) programs dealing with handling diving related medical issues. I am also an instructor trainer for the DAN programs. I teach the Emergency First Response First Aid and CPR Courses and am also an instructor trainer for that program as well. I am also an associate member of the Undersea and Hyperbaric Medical Society.

For more information on the course or to schedule a course, contact John Meyer, PADI Course Director at 206-300-0318 or e-mail me at [lets_dive \(at\) scubaventures-diving.com](mailto:lets_dive@scubaventures-diving.com).
